Summer Spotlight: Teeth Whitening

We offer free consults for anyone wanting to explore their whitening options, or simply ask at your next check-up and clean visit.

Why do I need a consult?

Not everyone's teeth are suitable for whitening, so 'this helps you to understand what is achievable with whitening. During your consult we help you determine how 'white' your teeth can get and create a plan with you to achieves your desired result with minimal tooth sensitivity and without compromising your dental health.

Why Professional Whitening?

Dental professionals are best placed to diagnose the reason for your tooth discolouration and provide advice on whether tooth whitening will be an effective treatment. We make sure your dental health is not compromised and that tooth sensitivity is minimised or prevented.
