Autumn Spotlight: Mouthguards

Book in for your custom fit mouthguard, to prevent injuries like this one

How do they work?

They absorb and spread the impact of a knock to the face to aid in prevention of mouth, teeth and jaw injuries.

When to wear?

Mouthguards should be worn during training sessions and on game day for any contact sports such as Hockey, Martial Arts, Boxing or football.

Why choose a custom fit?

Custom fit mouthguards provide better protection and are more comfortable, allowing you speak and breath easily while wearing.

Managing Your Health: Dental Health: Links to Chronic Conditions

Thursday 4th April 2024
6:00pm - 7:30pm
Online via Zoom

Recent Success

We have recieved lots of great feedback on our addition of television screens above the dental chairs. People have have found them very relaxing and a great distraction.

They have been installed for over a year now. So if you haven't seen them yet, here's your reminder to book in for your check-up and clean! Give us a Call or Book Online.
